

Just 22 of the reasons to continue supporting us in '22.

1. **First Family.** An escaped 24yr old mom with her 6 children all under the age of 8, escaped and gained custody from her step-brother whom she was forced to marry by Warren Jeffs. She was raped and abused with little to no education or chance of freedom. She was on the floor of a trailer in Phx working the night shift of a gas station in a dangerous area so she could watch her kids during the day. They were not in school. CPS was going to return them to the father.
We secured a townhouse in Scottsdale, enrolled the children in school, arranged volunteers for childcare for those that were too young, furnished the home with donations and found her therapy.
MMAD also arranged and sponsored Summer Camp including transportation for Ruby Jessop's six children, so that she could continue to work through the summer.
2. **Rescues: Rescued a 19 yr old girl from Sex Traffickers.** She called from the streets of Phoenix's most dangerous areas one night. Diana raced down, finding her hiding between cars in a parking lot. Not only did we get her medical care and shelter. She had a warrant for her arrest. We convinced the prosecution to drop all 11 felony charges which had her facing 13 years in prison for stolen credit cards, prostitution and drug possession. We got them to understand that she was a helpless victim of trafficking. We obtained a scholarship for her for six months of intensive residential treatment, four months IOP and then one month of intensive PTSD and Trauma therapy at UCF in Orlando. She is now happy, healthy, safe and well, studying for her GED in her own apartment with a full time job.

Rescued 18 year old mother and baby from Cane Beds, AZ a remote desert 'town' with no infrastructure. Just mobile homes and shacks. We had gotten a phone to her which she hid when not communicating with us. Authorities had been called but they would go and see everything seemed fine because the girl was afraid to talk in front of law enforcement. So six of us drove 7 hours through the desert and waited until the time was safe. The mother had been kept as a 'sex slave' for her brothers. The baby's father horrifically was one of her brothers. Donna, one of our amazing volunteers, housed them until we could find the proper residence for them in New Mexico. Donna traveled to New Mexico with the mom and baby.

Rescued over the phone.

Received a call on iMessenger. Diana pinpointed the location in North Carolina where the young woman had been held by sex traffickers for 9 months being sold off the internet. They were away but she was in a bathroom being guarded by a woman. Diana found the closest fast food restaurant, gave instructions to the victim who then hit the guard over the head with the shower curtain and ran. Diana alerted the restaurant to her arrival barefooted, drugged and in panic mode. Diana had them

call 911 who immediately got her to the hospital for a DNA test. Authorities were called, and before traffickers had arrived back to their house of horror, they were apprehended. Diana testified remotely along with the young woman and the predators are now in prison.

Young women now hear of us through word of mouth and contact us on Facebook Messenger. Once we gain their trust, we find out as much as we can regarding what they are experiencing and assess their level of present danger.

If they need immediate assistance, we get law enforcement involved, arrange transportation to the nearest airport and fly them to our Safe House in FL. If they are not ready to make the break as the majority are not, we keep in touch with them daily until they not only gain courage and confidence to make a strategic plan of how to exit most safely and quietly. Diana will then drive or fly to wherever they are, and escort them to our Florida Safe House or to a volunteer's residence in Scottsdale, if it is short term.

3. **Safe House.** Upon rescue or an emergency phone call, we immediately get our young person out of harm's way and transport them to our Safe House in Florida. We give them food, clothing and all basic necessities. We assess their immediate needs and begin to put together a plan of action for support. Most of all we give them love and understanding. Although we usually recommend leaving the area where the trauma has been occurring, we have also provided housing for six young people from Palm Beach County.
4. **Working with the prosecution.** We have saved 7 young people from prison through our MMAD program of guidance and support. We are now well known as the go-to team in the UT court system.
5. **Deterred Traffickers in Utah.** When neither the local police, Polaris nor Underground Railroad would help a 19 year old girl with known sex traffickers at her door who already forcefully 'groomed' two of her friends, the only thing Diana could think of was to tell the young woman to slide the MoviesMakingADifference business card that she was given by someone at an AA meeting that we had helped before. She told them that an advocacy anti-trafficking organization was helping her. It worked. We are now helping her move forward in her life. All alone out of Foster Care, this is the second time this has happened. That first predator is luckily now in prison.
6. **Gift of Sight.** We gave our legally blind young man sight with a special corrective contact lens enabling him to see properly for the first time in decades.
7. **Safe Havens.** We have Safe Havens in quite a few states for young women and men who miraculously don't have addiction issues but need intensive trauma therapy and coping lifeskills. But as the need becomes greater, we are in desperate need of more.

8. **Addiction Treatment ~ Faith Farm.** With our first young man paving the way 6 years ago, MMAD to date has helped 15 young men start on their path to a new life. Our first graduate completed the Faith Farm program in June 2016. After flourishing in sober living houses in which MMAD sponsors the first month. Most are now working in construction and handyman work and proudly supporting themselves.
- 9.. **Reading Program** One of the many young survivors of child labor with little to no schooling, our first scholarship recipient has started on-line one-on-one at **Love 2 Read.**
10. **PAX Campus IOP.** We obtained scholarships for our young adults for Intensive Outpatient Programs while working and getting GEDs. 3 have completed their 4 month programs with accolades.
11. **Young Women Enter Faith Farm and Phoenix Dream Center.** Young women are flown to either West Palm Beach, FL or Phoenix, AZ and are furnished with basic needs and admitted to the facilities for treatment and counseling.
12. **GEDs.** We enrolled 26 of our survivors in classes to prepare them for the GED exams, with 24 of the 26 passing the test.
13. **Resumes.** We help our young people create professional resumes and have found employment for numerous survivors after treatment.
14. **Work Training.** Waitress training was arranged for Ruby so that she could leave her dangerous job working overnights in the gas station. We then assisted in job placement at “The 5 & Diner” giving her just the self confidence that she needs. Ruby became Manager at The 5 & Diner!
15. **New Business Owners.** We helped develop a business plan and 3 of our young men have launched their own business.
16. **Christmas’.** Brought Christmas to Colorado City for the first time as it has been outlawed there for many decades. We gave Christmas trees to 40 mothers and provided gifts for hundreds of children.

Christmas Presents. We purchase and mail individual Christmas presents to over 60 of our MMAD youths, living around the States and Canada. Most are given presents for the first time in their lives.
17. **Baseball League.** We secured a gifted young man deprived of sports growing up in Colorado City, a place on a baseball league. It turns out he is an exceptional baseball player and become team captain.

18. **Transportation.** We find Mechanics around the country to fix cars for our MMAD Family members for the cost of parts and a tax write off in order for them to get to school and work.

Cars. In many areas there is no public Ubers or public transportation. We have purchased and have had vehicles donated for our survivors in order for them to be able to get to work, school and/or therapy.
19. **Daily Phone Calls.** Continually taking phone calls from kids or their mothers and/or fathers in need of advice, guidance and/or support.
20. **United Families.** After many families were torn apart under the rule of Warren Jeffs, we help contact loved ones and reunite them.
21. **Edwige Gilbert Counseling and Book.** Edwige has been counseling our MMAD “Kids” around the country via Zoom. This incredible need inspired her to put her Tool Kit into a book dedicated and with all proceeds going to our charity!
22. **Survivors Now Joining Us!** Survivors who are now leading successful lives and have heard about us are calling, stating that they wish they had had an organization such as ours to help in their healing. They would like to be part of ours to help others such as themselves.
And most proudly we announce that one of our original MMAD men has joined our Board of Directors. Nephi Hammon has overcome such terrible circumstances and struggles. Because of his incredible strength and heart (and a little love and support from MMAD) he now has an executive position at a large construction company, has been clean and sober for many years. And also has a Beautiful and fulfilling relationship with the magnificent Kaitlyn. They have found dental services for our MMAD many survivors in UT, most of whom have never seen a dentist. He speaks at church groups, addiction clinics and meetings and of course is a spokesperson and our go-to guy to assess our newcomers out west.

We are now raising funds for our next Movie to be MakingADifference, “**Carmelita**”. It will tackle the atrocities in Latin America, continuing up through our borders. It is a murder mystery that not only highlights the brutal cartels, but also the corruption in our own country that contributes to the horrific incidence of murders of young women who’s lives seem inconsequential, as we mistakenly think that they do not relate to our own.
